

Delta® and Peerless® Model Obsolescence

Date Posted: 2019-06-06

The Delta and Peerless product lines are growing at a rapid pace to provide our customers with a larger assortment of collections to meet their design, functional, and innovative technological needs. As part of this growth, we strive to maintain our portfolio with impactful models that provide value for consumers. This strategy ensures we're providing the right products while retaining our ability to provide world-class service to customers.

After a thorough assessment of models in the Delta trade, Commercial, Peerless, and International product lines, we have selected an assortment of models to be obsoleted. These models were identified and approved for obsolescence due to diminishing volumes over the last several years, replacement by a newer model, and/or complexity in the supply chain.

There are 539 models in the attached spreadsheet that will have effective obsolescence dates ranging from July 2019 to June 2020 with 83% going obsolete on 12/31/2019. The attached spreadsheet includes information regarding the obsolescence date and direct/recommended replacements where applicable.

Delta Faucet warranty policies will remain in effect for all obsoleted models, and standard repair parts specific to each model will be available for a minimum of five years following obsolescence (e.g., handle kits and lift rods).

Thank you for working with our showroom, commercial, and builder customers to find the right Delta products for their homes and projects. If you have any questions, please contact your Regional Sales Manager.

MODEL #	DESCRIPTION	BRAND	SERIES	Obsolete Date	Direct Replacement	Recommended Replacement
9158-SB-DST	Single Handle Pull-Down Kitchen Faucet	Delta	Fuse	7/31/2019	N/A	9181-AR-DST
