

## Hot Water on Command with ALPHA 15-55 HWR-D

Dear Partners,

Grundfos is expanding its range of energy-efficient hot water recirculation pumps with the [ALPHA 15-55 HWR-D](#).

The [ALPHA 15-55 HWR-D](#) is a hot water recirculation system for residential applications. The recirculation pump is controlled via remote Bluetooth activation push buttons and a temperature sensor mounted on the recirculation loop. The pump will circulate water through a dedicated hot water recirculation loop until there is a 10-degree temperature rise, the water reaches 102°F/39°C or runs continuously for five minutes.

The system's ALPHA 15-55 circulator includes plug and pump technology and a permanent magnet motor (ECM), which can reduce energy consumption by up to 50%, making it the most efficient pump of its kind. The [ALPHA 15-55 HWR-D](#) system saves thousands of gallons of water a year, decreases homeowners' energy usage and meets regulations like California's Energy Commission Title 24.

The [ALPHA 15-55 HWR-D](#) is currently available for sale. Please contact your local representative of Grundfos Sales for more information on this exciting new offering!
