

Delta® Contemporary Bar Faucet with Limited Swivel

Date Posted: 2019-07-31

To continuously enhance our product line, we are pleased to announce a running change to our Contemporary Bar Faucet to include a limited swivel.

Our customers are looking for faucets with limited spout swivel to address light commercial needs – especially for use in multi-family and/or hospitality projects. Kitchen and/or bar/prep faucets with a 360-degree swivel may be swung to an angle where the water sprays over the countertop, causing damage to the cabinet, flooring and possibly the units below. To eliminate this potential problem, this model now features a limited 120-degree swivel.

This is a **running change with no change to model numbers**. The impacted models are noted below and are now shipping with the limited swivel spout. Spec Sheets have been updated.

1959LF

1959LF-AR

1959LF-BL

1959LF-CZ

1959LF-KS

The label on the box will have a **with limited swivel spout** addition, so you can be sure this is the new limited swivel product. The images below illustrate the old and new labels.

New label

There are no changes to master carton quantity configurations.

Later this year, we will introduce limited swivel options for the Trinsic Single Handle Pull-Down Kitchen Faucet and the Trinsic Single Handle Pull-Down Bar/Prep Faucet.

Thank you in advance for your support of our efforts to continuously improve our product portfolio.
