

To Our Valued Partners,

We listened to feedback from you and your customers about the challenges of EvoPEX packaging on the jobsite. To help eliminate these challenges and increase organization on the jobsite, EvoPEX will transition to a new set of SKUs with new packaging and bag quantities. The new packaging will include the following features:

- Color coding by size
- Smaller package quantities
- Clear bags to be able to see the fitting configuration
- Resealable bags to keep fittings clean
- Larger print to read product descriptions

On October 1, the new SKUs will be available for order, and current SKUs will be obsoleted. Customer orders placed before October 1 will receive the current packaging and bag quantities. Customer orders placed on or after October 1 will receive the new packaging and bag quantities.

To ensure that you have the most current and accurate information, use the link below to access the new SKU file for EvoPEX and please be sure to review carefully.

Marketing literature is in the process of being updated and will be available digitally at the end of August, and available on the OnDemand store for order at the beginning of October.

We continually strive to improve the experience of our customers, and our goal is to help them become more organized and efficient when using our products on the jobsite. Thank you for your continued support of our RWC portfolio of brands, and if you have any questions or feedback, please reach out to your RWC Regional Manager.

Thank You,
